CONCORDIA UNIVERSITY

November 29, 2019

Collaboration Pattern

we can say that candidates to design patterns include: sessions, users, roles, broadcast, objects, repositories, and views.

Figure: An image of a collaboration

Critical Decision making

During project , there are many time this situation happens is use case and user story and that time is critical .

Figure: An image of a decision making

Reuse Potential

In this part we use User story as a partial reuse for implementaion and also use case are partial reuse for creating user story.

lessons learnt

In this project we learnt many things like LATEX and many other tools that are useful for effective result like scopemaster and many other design pattern for the artifacts and all.

LESSONS LEARNED
